PHOTOGRAPHIC INTERPRETATION REPORT

MISSION COVERAGE INDEX
MISSION G 3071
15 MARCH 1962

Handle Via **TALENT** Control Only

WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by U. S. personnel especially indoctrinated and authorized to receive TALENT information. Its security must be maintained in accordance with TALENT regulations.

REF/R-56/62

PREFACE

This Mission Coverage Index (MCI) furnishes a listing of intelligence targets covered by Mission G 3071. The listing provides the latest description based on photographic interpretation for each target covered by the mission. Items in the listing are arranged by WAC area and within each WAC by coordinates reading from south to north and from east to west. An explanation of column headings and photo reference data used in presenting the information is contained in the appendix.

For convenience of the user, a subject index to the intelligence targets has been included following the listing. Targets in the subject index are listed by category, and alphabetically by place name within each category.

Mission G 3071 was accomplished on 15 March 1962, and covered portions of all five provinces of Cuba (see accompanying Flight-Line Trace). Among the major targets covered were the Guantanamo Bay area, Camaguey, Santa Clara, Cienfuegos, the Havana complex, and Pinar del Rio.

APPENDIX
EXPLANATION OF COLUMN HEADINGS
AND PHOTO REFERENCES

City, Installation -- This column contains the name of the city or town nearest the installation, followed by the name of the installation. If the name of the installation is not known, it is titled according to its function. The city and installation names are followed by a capsule description, where appropriate.

Coordinates -- Coordinates are referenced to the southeast corner of the minute square. When the subject installation covers a wide area, coordinates are given for the approximate center of the installation.

WAC -- This column provides the World Aeronautical Chart number for the area in which the subject lies.

Installation Numbers -- The Installation Numbers column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the target. The second subcolumn lists the installation number assigned by NPIC. Installation numbers, when used to reference an item, should be prefixed by the appropriate WAC number, since installation numbers are repeated from WAC to WAC. For example, there is an NPIC target numbered 0585-1 and an NPIC target numbered 0586-1. In each instance, the NPIC installation number is 1, but the installations appear on different WACs.

A photo reference is provided for every item in the target listing. The photo reference indicates frame(s) on which the target appears, and conditions which affect interpretation of the target.
